TEXTS

Public Policy: An Evolutionary Approach, 3/e, by Lester and Stewart (Students can use the 2/e of this book)

Issues for Debate in American Public Policy, 15/e, by The CQ Researcher (Supplemental reader)

Public Policy: Theories, Models, and Concepts, by McCool (Supplemental reader of classic articles; used for article summaries)

COURSE DESCRIPTION

Public policy is one of the most exciting areas in political science and public administration. **PSCI 503** is designed to provide students with an overview of the public policy process and an overview of the history and evolution of policy studies. The course also provides an introduction to the fundamental theories, concepts, terms, and methodologies associated with policy analysis, and an introduction to the basic procedures used in conducting policy analysis.

The purpose of the course is to acquaint students with the complexities of public policy and policy analysis. The course is intended to provide students with an adequate background at a level of understanding appropriate for a variety of public sector employment settings. The course will blend theory and practice. Much of the course (the last five or six weeks) will be used discussing and analyzing a series of policy issues

included in the Lester and Stewart text and the *Issues for Debate in American Public Policy* text by Congressional Quarterly.

Primary Objectives

Objective #1: To provide students with a general understanding of public policy and policy analysis by reading and discussing classic and contemporary literature. Students will be exposed to the basic concepts, terms, and methodologies associated with policy studies. In this process, students will gain a general understanding of the history and evolution of policy studies. Students' proficiency will be measured via class discussions. *The written, comprehensive exam that was used in the past will not be used in this section of PSCI 503.*

Objective #2: To enhance students' ability to write concise reports pertaining to public policy. This objective will be accomplished by having students write article critiques and an 8-12 page policy summary. Details of these projects are explained later in the syllabus. Students' proficiency will be assessed via the written article critiques and the policy summary paper.

Objective #3: To provide students with the basic procedures used to conduct policy analysis. Students' proficiency in this area will be assessed by material included on the comprehensive exam. Students will also develop proficiency at "framing" policy issues. This idea is developed in the National Issue Forums; you can view these online at Public Agenda, www.publicagenda.org for a variety of policy issues.

Upon successful completion of the course, students should be able to:

- 1). Demonstrate knowledge of the history and evolution of domestic public policy
- 2). Demonstrate an understanding of the fundamental terms and concepts associated with public policy and policy studies, including the various stages of the *policy cycle*
- 3). Demonstrate proficiency at writing concise reports that deal with complex material
- 4). Be able to construct a policy analysis design
- 5). Demonstrate a thorough understanding of a specific policy by writing a policy summary.
- 6). Demonstrate the ability to "frame" complex policy issues.
- 7). Demonstrate the ability to present a complex public policy problem in a presentation format to a group.

It should be stressed that **PSCI 503** contains many other secondary objectives. For example, oral communication skills and critical thinking skills are not primary objectives in **PSCI 503** but are deeply embodied in the course. Additional and more specific learning objectives can be viewed at PSCI 503 Learning Objectives on Moodle.

REQUIREMENTS: POLICY PAPER, ARTICLE SUMMARIES, and ORAL PRESENTATION OF A PUBLIC POLICY ISSUE

Exam

There is not a written, formal exam in PSCI 503.

Article Critique Guidelines

The McCool text contains a variety of articles that will be assigned to students on the first day of class. Part of designated classes will be used for brief oral summaries of the assigned articles. The articles will be assigned to "individual students" and a written summary should be prepared to hand out to the class. The critiques constitute 20 percent of one's final grade. *All students are expected to read all of the assigned articles for each class but only have to prepare a written critique for their pre-assigned article.*

Each student is responsible to have thoroughly read the article, be prepared to present an overview of the article, and be prepared to respond to questions from the instructor and the class. The total time of the presentation should be no longer than 5 minutes. There are some specific questions one should consider while reading the article and developing a summary.

1. What is the major subject and theme of the article?
2. What is the major question the author addresses?
3. What techniques, tools of analysis, or methods are employed by the author to answer the question?
4. What major points does the author make?
5. What does the author conclude? What suggestions are made?
6. What is the relevance of the article to theory or practice? (What does it mean?)

Sample article critiques are posted on Moodle.

Policy Presentations

Each student will present a 20 minute presentation on a public policy issue. Students will select the policy, which must be approved to avoid replication by other students, and to ensure the policy areas is not too broad. This presentation is similar to what is used in PSCI 505 (the public budgeting class) but will consist of providing an overview of a policy, describing how the policy has been framed (or various ways it has been framed), an overview of the potential remedies to resolve the problem -- the pros and cons of the remedies. Students are encouraged to use PowerPoint or other presentation software.

Students should use the same policy that they plan to use for the policy paper. This policy does NOT have to be a broad policy, such as welfare or economic policy. It should be a narrow policy or a part of a much larger policy. For example, no one should select health care policy in America, but a person might select either the prescription drug plan associated with Medicare or "providing prescription drugs for senior citizens," and examine the various proposals.

The last few sessions of the class will be used for presentations.

Policy Paper

Students will select the policy. The topics should be approved to ensure the policy areas are not too broad. This paper is similar to what is used in PSCI 505 (the public budgeting class) but will consist of providing an overview of a policy, describing how the policy has been framed (or various ways it has been framed), an overview of the potential remedies to resolve the problem -- the pros and cons of the remedies. The paper should be 10 to 12 pages using single or double-spacing. The goal is to keep the paper as concise as possible while thoroughly covering the topic. Rather than write a longer paper, students can adjust the paper using single, space and a half, font size, etc. to make it fit within the 12 page limit. The title page and references, if endnotes or a bibliography are used, does not count in the 12 pages.

Samples of policy papers are provided on Moodle.

Grade Weights

Policy Paper..... 80% Due May 5 (Tuesday)

Article Critiques.....20% Due in class on assigned dates (Tuesday)

Attendance and Participation: Students are encouraged to participate in class discussions on the discussion board. Poor attendance and poor quality or lack of participating in class discussions will affect one's final grade. Students are expected to miss no more than three classes during the semester.

In the past I was able to post material on the Political Science website and make direct links in the syllabus. Due to changes at UM and a new "secure" server, I now have to use Moodle to post material for classes. You will find study guides, learning objectives, the policy paper (and examples) posted on Moodle.
